Dear Examiner DeBeradinis:

APPLICATION / PATENT FAMILY

Above-identified U.S. patent application serial No. 10/787,281 ("the '281 application"), filed February 26, 2004, is a continuation of U.S. application serial No. 10/053,685 ('685 application), filed January 24, 2002, now U.S. Pat. No. 6,747,855.

OWNERSHIP

Your Petitioner, Intel Corporation, having its principal place of business at 2200 Mission College Blvd., Santa Clara, CA 95052, represents that it is the assignee of the entire right, title, and interest in U.S. patent application serial No. 10/787,281 ("the '281 application"), filed February 26, 2004. The ownership is evidenced by the recording of the assignment for the '685 application (the parent application to the '281 application) in

the United States Patent and Trademark Office at reel 012536, frame 0260. The assignment for the '685 application specifically identifies that the assignment covers any continuation applications (e.g., the '281 application). The assignment documents have been reviewed, and INTEL CORPORATION certifies that to the best of its knowledge and belief, title to the '281 application is in INTEL CORPORATION. (37 C.F.R. § 3.73(b).)

TERMINAL DISCLAIMER

INTEL CORPORATION hereby disclaims the terminal part of any patent granted on the '281 application which would extend beyond the date of the full statutory term of U.S. Patent 6,747,855 ("the '855 patent"). INTEL CORPORATION hereby agrees that any patent so granted on the '281 application shall be enforceable only for and during such period that the legal title to said patent shall be held by the same entity holding the legal title to the '855 patent. This agreement is to run with any patent granted on the '281 application and to be binding upon the grantee, its successors, or assigns.

INTEL CORPORATION does not disclaim the terminal part of any patent granted

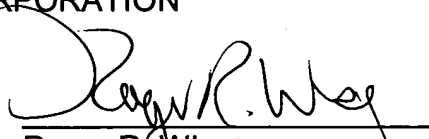

on the '281 application that would extend to the expiration date of the full statutory term as defined in 35 U.S.C. §§ 154 and 173 of the '855 patent, in the event that such patent later: expires for failure to pay a maintenance fee; is held unenforceable; is found invalid by a court of competent jurisdiction; is statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. 1.321(a); has all claims canceled by a reexamination certificate; is reissued; or is otherwise terminated prior to expiration of its full statutory term as shortened by any terminal disclaimer filed prior to its grant.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

I hereby aver that I have the authority of INTEL CORPORATION to make all statements, representations, and agreements set forth herein and that I am empowered to sign this document on behalf of INTEL CORPORATION
